What's New in This Release

Introduction

GridGain® Web Console is a free monitoring and management tool for Apache® Ignite™ and GridGain applications. The latest Web Console 2019.12.02 release includes bug fixes, additional validates for Web Agent configuration, and adds User activity tracking to the Administration Panel.

Fixed Issues

30 Issues were fixed and added in this release.

This list includes the following:

Issue ID	Category	Description
GG-25929	General	Maximum call stack exceeded on large cluster configuration
GG-26766	General	Add GridGain 8.7.9 support for Configuration Wizard generated files
GG-26467	General	Resolve vulnerabilities reported by npm audit
GG-26107	General	Alerts do not clear quickly enough after delete action
GG-25459	General	Should not attempt to reconnect after failed login
GG-25437	General	Update Demo mode configuration to prevent log warning messages
GG-25379	General	Validate Web Agent token property
GG-25274	General	Incorrect Last Login and Activity value when Admin becomes a different User
GG-24748	General	Track User Activities in Admin panel
GG-24748	Monitoring	If no Cache is selected, Actions apply to every Cache
GG-26106	Monitoring	Issue with chart initialization
GG-23862	Configuration	Sort properties alphabetically in Node Info

Issue ID	Category	Description
GG-24748	SQL Notebooks	Cancel Query button causes UI rendering issue

Known Issues

The following known issues have suggested workarounds.

Issue ID	Category	Description	Workaround
GG-25987	Monitoring	Show cluster as deactivated if activated from another session	Reload the page
GG-25718	General	No log file for Web Agent if started from an arbitrary directory	Follow the README.txt and do not start Web Agent from an arbitrary directory
GG-25334	Snapshots	Deleting snapshot with dependent snapshots shows wrong alert	Do not delete snapshots that have dependent snapshots when chain deletion is unavailable in the cluster
GG-24883	Snapshots	Create Schedule action isn't disabled if scheduling lib is not added to cluster	Either include the scheduling libraries or do not create schedules
GG-25247	SQL	Insufficient height of Notebooks table	Use the scrollbar
GG-25035	Configuration	Improve logging and error messages for SQL Schema Import	—
